

## LIFE SCIENCES TRANSLATION SERVICES

*Language Connections* is a veteran of the bio-medical industry. Our translation teams understand the demands on the Life Science sector, the players, and the regulatory constraints. With globalization, and a growing need for multilingual medical and scientific content, our Life Science clients rely on us as a critical part of their international business operations.

### GET IT RIGHT THE FIRST TIME

Foresight and preparation make all the difference in translating for the high-stakes life science industry. We know there is no room for error, and we are committed to avoiding missteps the first time through by:

- ✓ Consulting & Planning
- ✓ Exploring Advanced Solutions
- ✓ Collaborating & Communicating

We react quickly to changes and scaling up. Working together, we are able to avoid obstacles, and save time and money associated with rework.

### THE RESULT

Our customized approach, close project manager-client collaboration, life science expertise, and attention to linguistic nuances and cultural elements ensure high quality results. Your international materials are guaranteed to communicate your message effectively while being compliant with regulatory requirements.

### OUR TEAM

Our team has years of experience working with:

- BIOTECH / PHARMA
- MEDICAL DEVICES
- CRO's / CMO's
- HEALTHCARE Facilities and Institutions

### OUR CERTIFIED TRANSLATORS

- Hold advanced scientific degrees and have direct industry experience
- Are fluent in complex technical and medical terminology in their native languages and English
- Maintain utmost confidentiality with all projects

### OUR PROJECT MANAGERS

- Are multilingual in English and various target languages
- Have years of experience delivering high-value, sensitive projects on time and within budget

## CASE STUDY: HOW DO YOU TRANSLATE LARGE VOLUMES OF ADVERSE EVENT REPORTS IN 4 DAYS?

### BY CHOOSING LANGUAGE CONNECTIONS!

Our client, a large, multinational bio-pharmaceutical company\*, was conducting clinical trials in Japan. When they first approached Language Connections, their Japanese CRO had failed to report a large volume of adverse events, leaving them 4 days to translate and submit highly technical content to the FDA. The client was concerned they would not meet the deadline, while still receiving a high quality translation.

\* Due to confidentiality, the client's name has been omitted.

### TO ACCOMMODATE OUR CLIENT'S NEEDS, LANGUAGE CONNECTIONS DEVELOPED

#### A 4-PART SOLUTION

- 1 We organized teams of Japanese translators with expertise in clinical research.
- 2 Our translators were in different time zones to provide continuous translation for 24-hour periods.
- 3 We compiled a glossary of technical terms to ensure consistency across all translations.
- 4 Our in-house PM coordinated the entire process, and formatted all documents to ensure quality.
